Automate Processes and Synchronize Data with the webMethods.io Coupa Connector

Quickly integrate Coupa Procurement, Accounts Payable, and Expense Management services with third-party applications.

Overview
Integration, especially the synchronization of data between cloud and on-premises applications, is one of the biggest challenges for companies today. Software AG solves this integration challenge with webMethods.io, an integration Platform-as-a-Service (iPaaS) that connects cloud-based and on-premises applications.

With webMethods.io Integration, it’s never been easier to connect and make your business processes more efficient by allowing you to:
- Integrate Coupa’s Business Spend Management Software with your cloud-based SaaS applications, such as SAP S/4HANA®, ServiceNow®, Microsoft Dynamics®, and NetSuite®
- Integrate Coupa’s Business Spend Management Software with traditional, on-premises ERP, CRM and warehouse management applications, such as SAP® systems and Oracle® E-Business Suite
- Improve your effectiveness with a single business spend management instance with all your data synchronized in the cloud

Solution
Software AG’s webMethods Coupa Connector is an Integration Platform as a Service that simplifies integration between applications. With webMethods Coupa Connector, you can quickly integrate your Coupa Procurement, Accounts Payable and Expense Management services with third-party applications to automate your processes and synchronize data between your key data sources and systems of record.

Your financial data shouldn’t live in siloes. See how Software AG can streamline your financial processes and ensure quality data across your whole organization. As a global leader in the integration market for more than 15 years, Software AG integrates applications better than any other vendor.

Key Features & Benefits
- Real-time integration between Coupa and 3rd party applications (i.e. SAP, ServiceNow, Netsuite, Microsoft Dynamics, etc.)
- A simplified hybrid integration for cloud and on-premises applications
- Synchronize all your data and gain a single view of your business transactions
- Bi-directional data flow between Coupa and your ERP
- Seamlessly orchestrate your financial processes

About Software AG
Software AG began its journey in 1969, the year that technology helped put a man on the moon and the software industry was born. Today our platform makes a world of living connections possible. Every day, millions of lives around the world are connected by our technologies. A fluid flow of data fuels hybrid integration and the Industrial Internet of Things. By connecting applications on the ground and in cloud, businesses, governments and humanity can instantly see opportunities, make decisions and act immediately. Software AG connects the world to keep it living and thriving.

As the leader in integration, we can help you integrate anything—and everything. From hybrid integration and application integration, to data integration and Internet of Things integration, we’ve built our market-leading webMethods API Acceleration Platform to help free your data and deliver your initiatives with increased speed and agility.

- Fully supports both Cloud-to-Cloud and On-premise environments
- 300+ connectors to popular SaaS apps, On-prem apps, B2B and IoT apps

Coupa Use Cases

1. **Coupa » SAP**
   webMethods.io enables Coupa to serve as a strategic front end that extends the reach of your SAP Investment. Every employee and supplier can use Coupa at their desk or their mobile with little or no training or enablement. Data flows back and forth from Coupa and SAP through a single integration point, enriching both systems and helping everyone in your organization buy smarter. You can have SAP and Coupa integrated, up and running within a matter of weeks or months.

2. **Coupa » ServiceNow**
   webMethods.io connects Coupa and ServiceNow to enable smart spend, visibility and budget control of inventory and assets. Through process automation all software entitlements are tracked and accounted for, alleviating the need for manual and ad hoc

3. **Coupa » NetSuite & Oracle**
   webMethods.io and Coupa helps you extend the reach of your Oracle E-Business Suite, by plugging seamlessly into your established framework. Seamless NetSuite integrations you will be able to deliver measurable business value with minimal support from IT. From e-invoicing and expenses to sourcing and purchase requests, our integration creates real value for Coupa and NetSuite customers.
